

IMPACT

When HIPAA mandated transaction standards go into effect within the next two years, virtually every healthcare transaction will be processed electronically (EDI) or via the Internet. And IMPACT, our extraordinarily efficient claims processing system, will help you get the job done without the overhead of manual decision-making. All claim re-pricing and adjudication is fully automated thanks to its built-in processing logic. IMPACT automates everything, including subsidiary processes such as enrollment and provider import/export processes.

IMPACT is a reliable and proven claim processing solution currently at work processing claims for a variety of health care enterprises representing an aggregate 32,000,000 lives.

Comprehensive Transaction Solutions

IMPACT consists of a fully integrated set of comprehensive application solutions that deliver superior productivity and accuracy. These application sets include:

- ✍ PPO Re-pricing
- ✍ Claims Adjudication
- ✍ Claims Editing
- ✍ Claims Payment
- ✍ Enrollment
- ✍ Eligibility
- ✍ Premium Billing
- ✍ Plan Management
- ✍ Medical Management
- ✍ Member Services
- ✍ Electronic Data Interchange
- ✍ Reporting

Remarkable Flexibility

IMPACT is not a one-size-fits-all solution. Its remarkable flexibility will accommodate the varying business operations, procedures and data requirements of PPO's, TPA's, HMO's, IPA's, IPO's, MSO's, self-insured organizations and insurance companies.

There are no operational barriers with IMPACT. Its database management system supports all necessary member, client (plan sponsor), provider, plan definition and claim information. It is flexible and scaleable and optimized for efficiency and speed. All IMPACT licenses include Source Code. Consequently, it will be resident on your server and updated monthly or more often as required. All IMPACT users run the identical, most current software release.

When changes to your business requirements necessitate additional or modified processing capabilities, IMPACT will easily accommodate them. Our rapid application prototyping (using powerful programming tools we developed) ensures a timely deployment of new or updated software solutions that you require. You'll enjoy peace-of-mind while minimizing any repercussions that may be caused by delayed implementation of critical updates or enhancements.

Open Systems Environment

IMPACT is completely portable, and without any modifications, can run on virtually any hardware platform supporting most popular operating systems including Windows '95, 98, 2000, Windows NT, Novell and UNIX, among others.

Our Managed Care Systems management team will help you evaluate the benefits of replacing your system with IMPACT.
