

Third-Party Solutions Extend IMPACT's Value

Here at MCSI, we are committed to maintaining strategic alliances with market leading companies whose products and services extend the value of IMPACT for our customers. We seek to leverage these relationships to provide our customers with industry leading solutions to keep them ahead of their competition.

MCSI customers benefit from using Ingenix UCR MDR fee schedule databases in reimbursement calculations. Employers, group health insurers, managed care organizations and many other specialty service companies rely on ways to manage their reimbursement risk and establish equitable fees, while controlling administrative costs. MDR and PHCS provide prevailing charge data for more than 95% of all current CPT™-4 codes for surgery, evaluation and management, medicine, radiology and laboratory procedures. Users can calculate and view a procedure's value in any zip code and at any percentile using IMPACT's Quick Rate program.

The Ingenix Claims Edit System (CES) works seamlessly with IMPACT's automated re-pricing and adjudication module to assure accurate provider claims coding and reimbursement. CES streamlines requests to show you where to cut costs while increasing processor productivity. It's a tool your organization can't afford to be without.

ABF brings advanced technology to your healthcare transaction print output processes. Its solutions not only save money but also increase operational

efficiencies, enabling you to offer a higher level of service to your clients. Checks, EOB's, claim forms, system letters, COBRA bills, and HIPAA Certifications are but a few examples with potential for solid savings with ABF outsourcing solutions.

ABF is now the largest and fastest growing outsource vendor for healthcare claim document processing.

Formerly ENVOY, WebMD Transaction helps providers and payers maintain a flow of vital information by facilitating the transmission of claims and managed care transactions. MCSI clients benefit from smooth EDI transactions with the broadest range of trading partners.

NETrecall

Combine Net Recall and IMPACT to enhance your competitive position with a customized Internet presence that delivers eligibility, claims status, benefit information, provider directories, on-line enrollment and a host of other capabilities to your constituency. Net Recall is affordable, scalable and easy to implement.

eClaimScan, LLC

eClaimScan provides effective document management solutions for healthcare plan administration. Its clearinghouse specializes in imaging, data conversion, and data warehousing. Paper claims are processed into images and electronic files so that your organization can streamline data entry and eliminate the paper shuffle. Enjoy increased productivity with eClaimScan, LLC.

PaperClip Software provides convenient, centralized access to your scanned images (i.e. claim forms, referrals, enrollment forms). A hot-key combination from any screen within IMPACT will retrieve all relevant images related to the current claim, enrollment record, case management record, or any other record.
